French Patriots Help Clear Corsica

These are some of the guerrilla French patriots on Corsica who took to arms after Italy's surrender and began driving the Nazis off that Mediterranean island.

(U. S. Army Signal Corps Radio-Telephoto From NEA) These are some of the guerrilla French patriots on Corsica who took to arms after Italy's surrender and began driving the Nazis off that Mediterranean island.

By PEGGY RHODES - United Press Staff Correspondent - New York, Oct. 11 (AP)—Lt. Stanley Drennan, U. S. Army, medical officer aboard an American landing ship in the South Pacific, has never seen a bayonet, hand grenade or crawling tank. He has seen a Japanese plane squeezed through.

On a peaceful tropical evening last July, Lieutenant Drennan was leaning against the deck rail of his ship, gazing into the dark jungles beyond the beach when a voice broke into his reverie.

"Excuse me, sir," he said. "An emergency case which looks pretty bad. Someone has been injured. The boy the doctor saw before him looked much more dead than alive. Someone had tied an emergency case to him."

Pvt. John M. Drennan, U. S. Army, medical officer aboard an American landing ship in the South Pacific, has never seen a bayonet, hand grenade or crawling tank. He has seen a Japanese plane squeezed through.

"The boy made a pathetic attempt to get up," he said. "He was bleeding from the chest. I tried to stop the bleeding, but he was bleeding from the chest. I tried to stop the bleeding, but he was bleeding from the chest."

He glanced around him. He would have to use the table in the officers' washroom—even though it was too wide and much too low. His mind raced. He remembered that he had a first aid kit in his room. He opened it and found a bottle of iodine.

In a few moments, workers had fastened the body to the table. The doctor worked steadily and swiftly. It was devilishly hard to get the body into the table. The doctor worked steadily and swiftly. It was devilishly hard to get the body into the table.

Little Johnny Maloney was taking with his chin up. He knew the doctor was working. He grinned when they hoisted him to the table. "Good news, as it is," he said. "I got to get well and get back into the scrap."

Drennan worked silently and swiftly. It was devilishly hard to get the body into the table. The doctor worked steadily and swiftly. It was devilishly hard to get the body into the table.

It was the toughest job in the young physician's short career, but he did it. He had to get the body into the table. He did it. He had to get the body into the table.

Wife: "My husband has no bad habits. He never drinks. He never smokes. He never gets into any kind of mischief. He is a good man. He is a good man."

Friend: "Does he smoke?" Wife: "Only in conversation. He likes a cigar after he has had a good dinner, but I don't suppose he smokes two cigars a month."

Wife: "My husband has no bad habits. He never drinks. He never smokes. He never gets into any kind of mischief. He is a good man. He is a good man."

Greatest Carrier Task Force Lays Wake Island in Ruins

(Editor's Note: Sea and air forces of the Pacific fleet battered Wake Island for two days last week. Admiral Chester W. Nimitz reported Sunday that the attack resulted in the destruction of at least 61 enemy planes, two ships and numerous shore installations at a cost of 18 American aircraft. Associated Press War Correspondent Eugene Burns, who accompanied a navy task force on the raid, supplies additional details.)

By EUGENE BURNS - Aboard an Aircraft Carrier, Oct. 10 (Bywire)—The greatest carrier task force ever assembled battered Japanese-held Wake Island for two days last week. The attack resulted in the destruction of at least 61 enemy planes, two ships and numerous shore installations at a cost of 18 American aircraft.

Typical of the destruction is this: In one area containing six warehouses, only two were left standing. The other four had been reduced to a mass of twisted metal and splintered timbers.

After the surface ships completed their bombardment, the land-based four-engine bombers came into the island. They dropped bombs on the airfield, the radio station, the mess hall, the mess hall, the mess hall.

Good weather favored the operation. There was no rain to prevent landings of the bombers. The weather was perfect. The weather was perfect.

Cruisers accompanied by destroyers attacked within binocular sight of Wake the first afternoon. The attack was a success. The attack was a success.

Since her surrender, she has given the Allies some help in the form of a radio station. The radio station has been used to communicate with the Allies. The radio station has been used to communicate with the Allies.

Our Daily Bread

Sliced Thin by The Editor - ALEX. H. WASHBURN - Mathematics: Trail Blazer - The Magic Stone - A booklet that comes to my desk from E. Kelsey of Zenith Radio corporation, Chicago, bears the baffling title "Reference Guide to Ultra High Frequencies"—but a quick look inside reveals some interesting information.

Mr. Kelsey in his forward says that mathematics is the "cornerstone of civilization," and bolsters his opinion with a list of famous mathematicians.

"For example, consider the prediction by J. Clark Maxwell, famous 19th century mathematician, that electromagnetic waves would be found to travel through space at the speed of light, approximately 186,000 miles per second. Heinrich Hertz, along with other experimenters, later proved this prediction.

Mr. Kelsey then tells the story of the first mathematician. He tells the story of the first mathematician. He tells the story of the first mathematician.

Pythagoras (Greek, 540-480 B.C.), mathematician and philosopher, was the first to give the world the abstract idea of a number, as distinguished from the concrete.

History Almost Repeats Itself in Italy's Case

By AUSTIN BEALMER - Associated Press Foreign Staff - Rome, Oct. 11 (AP)—The Axis pattern, Germany, Italy today completed an about-face which almost duplicates the course she followed in World War I.

Her stand at the side of Germany in the present war ended Sept. 8 when Gen. Dwight D. Eisenhower announced the unconditional surrender of the government of Premier Pietro Badoglio.

Acting as an armistice was signed Sept. 3 the day Allied troops invaded the Italian mainland after their breakthrough at Salerno. Italy was an Axis partner three years, two months and 20 days.
